

Alex Besmelcev

FRONTEND ENGINEER

ABOUT ME

Frontend Engineer with 6+ years of experience developing scalable web applications using Vue.js, TypeScript, and modern frontend technologies. Experienced in designing maintainable frontend architectures, modernizing legacy applications, developing reusable component systems, and building high-load, real-time products. Successfully delivered Web3 applications, enterprise dashboards, and P2P platforms with complex business logic. Actively contribute to architecture discussions, code reviews, and engineering best practices. To maximize development efficiency, I leverage Large Language Models (LLMs), including Claude and Gemini, for architecture exploration, debugging, refactoring, and technical research, ensuring rigorous validation of all generated solutions prior to production deployment. Passionate about clean architecture, developer experience (DX), and building software that remains maintainable as products scale.

WORK HISTORY

■ 2024-02 - Present

Frontend Developer
emcd.io, Singapore (Remote)

- Designed and implemented core frontend modules for a high-load P2P cryptocurrency marketplace, including ad listings, deal flows, real-time chat, and user profiles.
- Developed enterprise-grade B2B dashboards featuring advanced analytics, reporting, and user management tools.
- Led the migration of a major application from Vue 2 (Options API) to Vue 3 (Composition API), modernizing the architecture and significantly improving code maintainability.
- Built a comprehensive library of reusable UI components, fully documented in Storybook and synchronized with the Figma design system.
- Integrated REST APIs and WebSockets to ensure reliable, low-latency, real-time communication.
- Participated in frontend architecture design, peer code reviews, and the continuous optimization of team engineering practices.
- Utilized LLMs (Claude and Gemini) to accelerate debugging, refactoring, documentation, and code analysis, validating all AI-assisted solutions before release.

■ 2023-09 - 2023-12

Contract Frontend Developer
WSender, Novosibirsk, Russia

- Contributed to the foundational project architecture and designed core frontend business logic.
- Developed pixel-perfect, responsive layouts with rich UI interactions based on strict product specifications.
- Built interactive 3D user experiences using Three.js, creating custom animations and visual effects for product interfaces.

■ 2023-07 - 2023-09

Contract Frontend Developer
Anketolog, Novosibirsk, Russia

- Designed the application structure and frontend logic for a high-load, survey-based web platform.
- Delivered highly adaptive and accessible (WCAG compliant) layouts aligned with modern UX/UI requirements.

■ 2022-08 - 2023-06

Frontend Developer
Tensor, Novosibirsk, Russia

- Developed robust, fault-tolerant user-facing pages and state-management components interacting efficiently with data-heavy layers.
- Shipped scalable and maintainable UI solutions for complex, enterprise-level software.

■ 2021-05 - 2022-06

Frontend Developer
Crypton Studio, Tomsk, Russia

- Built blockchain-integrated web interfaces and specialized Web3 components.
- Programmed responsive, secure frontend layers for seamless interaction with smart contracts and decentralized data.

■ 2019-09 - 2021-05

Web Developer
Chrono, Novosibirsk, Russia

- Created interactive UI elements, including custom 3D ring animations and complex scroll-driven effects.
- Integrated external services (DHL, VK APIs) and extended features within the NetCat CMS framework.
- Maintained frontend application logic and optimized database interaction modules.

SKILLS

Frontend:

Vue.js (Vue2&Vue 3), React.js, Nuxt.js, Next.js, JavaScript (ES6+), TypeScript, Three.js, HTML5, SCSS

Architecture:

FrontendArchitecture, Component-driven Development, Reusable UI Systems, WebSockets, Performance Optimization

Tools:

Git, Storybook, CursorIDE, Figma, Chrome DevTools, Agile / Scrum

AI-assisted Development:

LLM, Claude, Gemini, AI-assisted Code Review, Prompt Engineering, Refactoring

EDUCATION

Bachelor'sdegree:Information Systems and Technologies in Media Industry

Siberian State University of Telecommunications And Information Sciences - Russia, Novosibirsk

Associate's degree: Information systems and programming

NSU Higher College of Informatics - Russia, Novosibirsk

INTERESTS

📷 Photography

Ienjoy capturing moments and turning everyday scenes into visual stories. It helps me stay

- creative and notice details — a mindset that carries into my work as a developer.

🌍 Traveling

Traveling inspires me with new perspectives and cultures. Whether it's mountains or cities, I love

- exploring places that challenge my routine and spark curiosity.

🎮 Video Games

Video games are both a way to relax and a source of creative inspiration. I especially enjoy story-

- driven games and immersive worlds that blend art, logic, and interaction.
